## **DETAILED ACTION**

#### **Information Disclosure Statement**

1. Information Disclosure Statement filed on 09/16/2004 is acknowledged by the examiner; A copy of a signed PTO-1449 attached with this office action.

# Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6-15 and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Amazeen et al. (U.S. Patent 4,745,812).

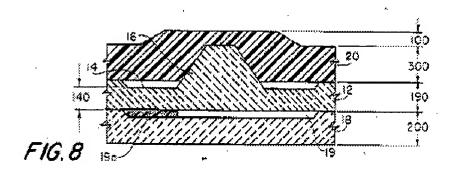

## Regarding claim 1:

Amazeen discloses a process tolerant sensor apparatus comprising:

a bottom substrate (fig. 8, unit 18); b) a top substrate (fig. 8, unit 12, 20); c) a

plurality of sensors disposed between the bottom substrate and the top substrate

(Col. 5-6, Lines 6-2);

Page 2

Application/Control Number: 10/775,044

Art Unit: 2863

d) a plurality of electrically conductive interconnects disposed between the bottom substrate and the top substrate (Col. 5-6, Lines 6-2); e) electrically active components connected to the conductive interconnects for at least one of data acquisition, data storage, and communications; and bonding material substantially filling the volume between the bottom substrate and the top substrate (Col. 6-7, Lines 3-32).

### Regarding claim 18:

Amazeen discloses in a combination: a bottom semiconductor wafer (fig. 8, unit 18); a top semiconductor wafer (fig. 8, unit 12, 20); a plurality of sensors disposed between the bottom semiconductor wafer and the top semiconductor wafer (Col. 5-6, Lines 6-2);; a plurality of electrically conductive interconnects disposed between the bottom semiconductor wafer and the top semiconductor wafer (Col. 5-6, Lines 6-2); an electronics module comprising a housing containing electrically active components connected to the conductive interconnects for at least one of data acquisition, data storage (Col. 6-7, Lines 3-32), and comunication; and a bonding material substantially filling the volume between the bottom semiconductor wafer and the top semiconductor wafer (Col. 6-7, Lines 3-32).

Regarding claim 2, Amazeen discloses bottom substrate is a silicon wafer (Col. 5, Lines 51-59); Regarding claim 3, Amazeen discloses the top substrate is a silicon wafer (Col. 5, Lines 44-59); Regarding claim 4, Amazeen discloses top substrate is quartz (Col. 5, Lines 36-41); Regarding claim 7, Amazeen discloses

Art Unit: 2863

RF shielding material (Col. 5-6, Lines 60-2); Regarding claims 8, 15, Amazeen discloses shield electrically conductive layer (Col. 5-6, Lines 60-2); Regarding claim 9, Amazeen discloses shielding efficiency over predetermined frequency range (Col. 5-6, Lines 60-2); Regarding claim 10, Amazeen discloses at least one of the bottom substrate and the top substrate is thinned so that the thickness of the sensor apparatus substantially equals the thickness of a predetermined workpiece (fig. 8, unit 12, 18); Regarding claim 11, Amazeen discloses the plurality of sensors and electrically conductive interconnects are disposed upon the surface of the bottom substrate, a mirror image pattern of the sensors and interconnects is disposed upon the surface of the top substrate, and wherein the mirror image pattern and the sensors are of substantially the same thickness (fig. 8, unit 12, 18); Regarding claim 12, Amazeen discloses at least one of the electrically active components is disposed upon the surface of the bottom substrate, the top substrate has a hole, and the at least one of the electrically active components extends into the hole in the planar top substrate (fig. 8, unit 12 and 18); Regarding claim 13, Amazeen discloses the bottom substrate is electrically isolated from the top substrate (Col. 5, Lines 46-59); Regarding claim 14, Amazeen discloses the bottom substrate is electrically connected to the top substrate (Col. 5, Lines 46-59); Regarding claim 19, Amazeen discloses the top semiconductor wafer having a hole for receiving at least a portion of the electronics module (fig. 8, unit 12); Regarding claim 20, Amazeen discloses the top semiconductor wafer having a layer of

electromagnetic field shielding material (Col. 5-6, Lines 60-2); Regarding claim 6, the material is Epoxy (Col. 6, Lines 34-44).
